

The mini ropes course also has challenges like Alone or together with friends, the mini ropes course for kids guarantees loads of fun, play- fully enhances concentration, trains motor skills and coordination and has a great pull on systems. Its low height is perfect for the needs of little adventurers. The course is erected in accordance with the valid EN 1176 standards and approved by TÜV.

MINI ROPES COURSE FOR KIDS

Fun and action for junior adventurers

The team course is hugely popular for team building events and company functions where communication skills while having a fun-filled challenge in the team along with a good dose of adrenaline is something to remember. The participants develop trust, team spirit and the focus is on strengthening the solidarity and sense of fellowship in a group. The course elements are planned and arranged in such a way that it requires the highest degree of teamwork to overcome the challenges and develop solutions.

TEAM ROPES COURSE

New team power on the team tower

This successful trend is the modern version of the canopy trail, which originally came from South America, and combines flying, adrenaline and the joy of being alive. Flying fox or rope slide courses are also an attractive way for mountain lift operators to boost the utilisation of their lifts outside of the winter season. After using the aerial lift to ascend, visitors experience a spectacular descent down to the gorges and lakes on zip lines. Arrester systems make extreme inclines and distances of up to 1,000 metres possible and guarantee a real adrenalin rush. A flying fox course increases the appeal of any region and can be operated independently or as part of an existing facility.

FLYING FOX ZIP LINE PARK

The open-air thrill for high flyers

A ropes course is a sequence of challenging obstacles and bridges suspended between real live trees or artificial tree trunks at a height of 3 to 15 metres. At both the starting and end point of each obstacle is a platform. Depending on the chosen difficulty level, visitors are required to tackle various elements like suspension bridges, spider webs or rope slides. A ropes course conform to the highest nature conservation and environmental standards. Our special clamping technique ensures that the bark of the trees remains unharmed and the natural ecosystem of the forest is maintained.

ROPES COURSE, FOREST HIGH ROPES COURSE

An adrenalin rush in lofty heights

WE'LL MAKE YOUR VISITOR NUMBERS SOAR

Ropes courses and flying fox courses are a persistent trend in recreation and sports – both in summer and in winter. They expand the tourism offering and are becoming more and more popular among young and old alike. Ropes courses and flying fox courses give each and every visitor the chance to test their limits and to experience excitement, fun and action in the great outdoors.

We design, plan and build ropes courses and flying fox courses around the world – with years of experience, the highest safety standards and always adapted to our customers' individual needs and wishes.
